

Trade In Your Bioanalyzer Instrument

Advance your sample quality control with an updated solution

For more than 20 years, molecular biologists and biochemists like you have benefited from RNA, DNA, and protein analysis using the Agilent 2100 Bioanalyzer system. Now you can move your sample quality control to the next level with the new generation of Agilent automated electrophoresis instrumentation.

For a limited time, you can trade-in your Bioanalyzer system and receive a credit toward an Agilent TapeStation, Fragment Analyzer, or ProteoAnalyzer system. If you purchase a new or refurbished Agilent 4150 or 4200 TapeStation system (G2991BA, G2992AA, G2991AAR, G2991BAR, G2992AAR), a new Agilent 5200 or 5300 Fragment Analyzer system (M5310AA, M5311AA), or a new Agilent ProteoAnalyzer system (M5350AA), you are eligible to receive a trade-in credit when replacing an existing Bioanalyzer instrument (model G2939B).

Trade-in instruments will be refurbished to like-new standards at Agilent, in order to reduce waste.

See how you can move your lab forward today.

Promotion Terms and Conditions:

- Promotional offer is valid until 31 May 2025.
- This promotion can be combined with any other promotion or sales offer.
- All promotional products must be placed on the same purchase order.
- Multiple orders may be placed during the promotional period.
- For each new TapeStation, Fragment Analyzer or ProteoAnalyzer system, multiple trade-in systems can be returned and can qualify for trade-in credit.
- Promotional products cannot be substituted with other Agilent products.
- Agilent Technologies reserves the right to modify or discontinue this offering during the promotional period.

Note: This trade-in promotion is available in the following countries: Austria, Belgium, Canada, China, Denmark, Finland, France, Germany, Ireland, Italy, Korea, Luxembourg, Singapore, Spain, Sweden, Switzerland, The Netherlands, United States, United Kingdom.

The environmentally-friendly Agilent Certified Pre-Owned Instrument program has received the 2022 Environment + Energy Leader Award.

The new generation of Agilent automated electrophoresis instrumentation

Agilent TapeStation systems

The TapeStation systems are all-in-one platforms that provide rapid, end-to-end, and automated DNA and RNA sample QC. No matter your starting sample type, the TapeStation system can analyze them with accurate and precise ScreenTape devices for low-, medium-, and high-throughput labs.

Agilent Fragment Analyzer systems

The Fragment Analyzer systems help eliminate library prep bottlenecks by allowing automated sample QC of DNA and RNA samples. A broad kit portfolio is available to analyze different sample types (including genomic DNA, small and total RNA, HMW DNA, and cfDNA).

Agilent ProteoAnalyzer system

The Agilent ProteoAnalyzer system is an instrument designed for the assessment of both reduced and non-reduced protein samples. Streamlined sample preparation and intuitive software simplifies protein analysis workflows, making it easier for you to analyze the size and purity of your protein of interest.

For Research Use only. Not for use in diagnostic procedures.
